Oil paint is hard to get out of clothes so please bring an apron or something to protect your clothes.

There are hundreds of brushes and bristle types to choose from but don't get overwhelmed if you are just starting out, any oil brushes natural or synthetic will work. (Can look at Artist Loft or Princton brands at Micheals) I list two brush sizes in the supply list below for affordability, but a small, medium, and larger brush would be great to have. I like working with an angled brush to allow for different thicknesses in my mark making.

I suggested a wooden, glass or paper pallet for mixing but for cost efficiency you can wrap any flat surface in aluminum foil.

11" x 14" Canvas/ Canvas board (if you like working larger 16"x20"	$10
